

2.1M x 2.4M Flat Pack Storage Unit

Stock Code: diy-02-02

Category: Storage Units

£2,400 exc.VAT

Having an extra storage space has not been this easy. You do not need any special tools, equipment or expertise to assemble the DIY Units. With its thermal insulation technology, you can enjoy your DIY Unit in any weather condition.

DIY Units offers a range of different sized, high-quality, flat pack modular containers, which could be self-assembled easily. Strong steel boxes similar to shipping containers with super easy assembly and delivery.

The smallest of the whole product range. New generation prefab containers! It has never been this easy and quick to build a storage space. The units are watertight, insulated and secure from theft with insulated galvanized steel panels.

External Length	2.150 x 2.400 mm
Internal Length	1.950 x 2.200 mm
External Height	2.450 mm
Internal Height	2.280 mm
FlatPack Dim.	2.150 x 2.400 x 370 mm
Total Weight	325 kg
Lower Chassis	180 Kg
Roof Chassis	60 kg
Wall Panels	1.000 x 2.280 mm
Wall Panels Weight	11 kg
Door Dim.	890 x 2.000 mm
Door Weight	28 kg

Unlike the other storage units sold, DIY Units still provide strong wall panels, steel frame, wooden-like flooring, surface mounted electrical installation materials for the storage units. All included with your flat packed new cabin. Even the electric kit! Electric kit contains 32A fuse, over plaster socket, plug, 120 cm LED armature lighting and cables comes with all our flat pack product range!

All the external and internal surfaces of our standard flat pack product range, are made from fully galvanized steel powder coated with RAL 9002 which provides protection against rust and gives a smooth finishing. We may also offer RAL 7016 for customized orders.

All you need is 2-4 people! In less than 2 hours' time you will fix the panels with the base and the roof, with screws. You can even disassemble to original flat form if you need to move the unit. As easy as an Ikea assembly!!!
